Face Authorization Solution

Oloid Connect is a contactless authentication application for time and attendance clocking, payroll compliance, and workplace access.

The admin-based app allows employees to authenticate employees or visitors to enter company premises by scanning their faces to unlock doors.

It complies with employees' health checks by measuring body temperature and providing real-time questionnaires.

Along with face recognition technology, Oloid Connect uses gestures and voice-based technology for self-attestation check-ins.

Core Features

Instant face authorization

An easy and quick way to authenticate employees or visitors via face recognition with convenience.

Authenticate with QR code

Eliminates third-party hardware requirements, unlocks doors easily, and free-up time and manpower.

Automatic voice recognition

Without the need for touch, you can do a self-attestation check-in by voice alone.

Accurate thermal check

Within a matter of seconds, the contactless thermal check that is attached to the iPad takes quick readings thereby avoiding waiting around time.

Secured Access Control

Without sacrificing simplicity grant access with a face that authenticates employees' identities.

How Oloid Connect Works

Oloid Connect app is available in the app store. It has iPhone and iPad solutions. It uses facial recognition and Identity QR Authentication to authenticate the users.

Install the Oloid Connect app

1. To get the Oloid Connect mobile app, search for Oloid Connect in the app store for your device and install it.
2. Sign in with your admin email address, and view the details screen to see Hardware Check, Health Check, and Thermal Camera.

Before you begin

You must be an administrator in the Oloid Tenant Admin Portal to upload user face to the Oloid Connect app.
